### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious a test structure of the step coverage for optical waveguide production, which includes a substrate with a optical waveguide structure, is characterized in that: at least one test structure is constructed at the remainder area outside the optical waveguide structure and has the same upper covering layer as the optical waveguide structure; and step coverage of the upper covering layer is tested by direct etching and the step coverage of the optical waveguide structure is extrapolated in combination with the rest of claim 1.

It is noted that the claim 1 is allowable because the unique combination of each and every specific element stated in the claim.

The prior art, either alone or in combination, does not disclose or render obvious a Test method of the step coverage for optical waveguide production, comprises the steps of: a. providing a substrate with a covering layer on the surface; b. forming a waveguide layer on top of the covering layer; c. forming a protection layer image using lithograph method over the waveguide layer, which covers the appointed optical waveguide structure area; d. setting a test area in the area left out by the protection layer image and erasing the waveguide layer and the covering layer to expose the substrate; e. constructing at least one test structure in the shape of the optical waveguide structure in the test area; f. constructing a waveguide structure on the waveguide layer and removing the protection layer image; g. depositing a upper

covering layer to cover the test structure and the waveguide structure completely and forming the optical waveguide structure with the waveguide structure and the upper covering layer; h. executing annealing treatment to the substrate; and i. etching the test structure for testing the step coverage of the upper layer on the test structure and extrapolate the step coverage of the optical waveguide structure in combination with the rest of claim 6.

It is noted that the claim 6 is allowable because the unique combination of each and every specific element stated in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
